

## Beoordelingsmatrix ('rubric') NVSHA eindtoets module wetenschap: onderzoeksplan

	Poor	Minimal	Adequate	Good	Excellent
<b>Probleemstelling &amp; Relevantie - <i>Literature Review</i></b>	Fails to provide empirical research supporting topic. Synthesis and organization is based on limited information. There is little or poor link between the literature and the hypothesis or question.	Minimal review of the literature and little mention of empirical sources. Poor synthesis and organization of the literature, which minimally links it to the hypothesis or question.	Adequate review of the literature and empirical sources. Good synthesis and organization of the literature, which is clearly linked to the hypothesis or question.	Good review of relevant and empirical sources. Good synthesis and organization of literature that is clearly linked to hypothesis or question.	Insightful review of relevant and empirical sources, citing important works in the field. Exemplary synthesis and organization of literature that is clearly linked to hypothesis or question.
<b>Doelstelling - <i>Hypothesis statement or question</i></b>	Fails to provide adequate statement of research question or hypothesis.	Poor statement of research question or hypothesis.	Adequate statement of research question or hypothesis.	Clear statement of testable research question or hypothesis.	Testable research question or hypothesis clearly stated.
<b>Plan van Aanpak - <i>Methods</i></b>	Fails to provide statement of research design, sample, instruments, and/or procedures.	Provides poor statement of research design, sample, instruments, and procedures with large degree of vagueness.	Provides adequate statement of research design, sample, instruments, and procedures with some degree of vagueness.	Provides good statement of research design, sample, instruments, and procedures with little degree of vagueness.	Provides clear and descriptive statement of research design, sample, instruments, procedures.

<b>Analysis</b>	Analysis overview is inadequate to research question.	Analysis overview is vaguely described.	Appropriate and adequate analysis overview.	Appropriate and good analysis overview, with some detail regarding data entry & storage.	Excellent, appropriate and advanced analysis overview, with attention to issues of data entry and storage.
<b>Discussion</b>	Fails to provide adequate outline of limitations of study, possible further research, or ethical considerations.	Poor outline of some limitations of study, possible further research, or ethical considerations.	Adequate outline of limitations of study, possible further research, or ethical considerations.	Good outline of limitations of study, possible further research or ethical considerations.	Sophisticated outline of limitations of study, possible further research or ethical considerations.
<b>Haalbaarheid - Feasibility</b>	Fails to provide adequate outline of feasibility	Poor outline of feasibility, with few relevant aspects	Adequate outline of feasibility, with several relevant aspects	Good outline of feasibility, including costs, phasing, participation, consent, approval, managerial support	Sophisticated outline of feasibility, including costs, phasing, participation, consent, approval, managerial support
